IIM VIDEO DEMO TEASER TRANSCRIPT

Intelligent Insurance Manager, also known as IIM, is Proctor Loan Protector's proprietary insurance tracking tool for our outsourcing clients. As a partner that operates as an extension of your business, IIM provides complete transparency for vendor management, allowing servicers to view insurance documents, view borrower correspondence, monitor transaction history, listen to recorded borrower phone calls, check on claim status, and generate reports.

To see a demo of IIM with one of our experts, submit a request and we'll show you why so many servicers elect Proctor Loan Protector to perform insurance tracking.
